## KOREAN DOOR

Doorway boutique, high-end customization

In an era where the rhythm is too fast  
Light life, high quality has become the happiness of people's life,  
Through a series of user research, design and development,  
Insight into the lifestyle of consumer groups,  
Give the product a richer aesthetic connotation,  
Experience emotional resonance with consumers,  
Let living experience return to the most authentic taste of home.

## NEW ENVIRONMENT

The new environment series is the “Rolls Royce” in Korean-style doors, divided into two new product classifications, which are simple and elegant, combining abstract artistic concepts to create a strong visual impact, exuding an atmosphere of sophistication, while enjoying a luxurious aesthetic.

Black Gold Era – Understated yet extraordinary, a timeless color symbol that conquers regardless of the world's changes. Black, the color that conquers all, and gold, the hue of regal dominance. One is mysterious and profound, the other dazzling and eye-catching. The collision of these two creates a visual impact and artistic beauty that resonates deeply with the soul.

The New Environment Official

As a company that integrates German door-making craftsmanship, we fully utilize cutting-edge technology to strive for perfection. Our Korean-style doors undergo hundreds of processes, whether it's meticulous hand polishing or skilled operation of new laser cutting machines. We believe that every effort yields its reward. The fruits of our hard work are products that embody our craftsmanship and dedication. With attention to detail, elegance runs deep, and the style naturally soars.

## NEW ENVIRONMENT

### Natural Wood Style

The appearance of a home determines the way of life. Natural wood is the element closest to nature. When the warm and comfortable hues of natural wood meet the restrained and calm metallic high-grade gray, the interplay of cold and warm creates a uniquely cozy feeling and a perfectly balanced sense of high-end simplicity.

## CONDENSATION

**Condensation**  
Condensing the beauty of simplicity and rustic charm

It crystallizes the art of living space, elevating the entry experience once again. We have discovered the most concise design language, narrating the concept of entry doors through innovative furniture design. The grand color scheme and the central control design prevent it from appearing heavy, offering a sense of lightness within its simplicity. With clear textures, modern and classical art represent two distinct directions in exterior design. We re-examine these to achieve a more perfect integration.

## NEW ENVIRONMENT

A style, a simplicity, a fashion, permeated with a leisurely atmosphere of life, allows you to appreciate the boundless scenery of fashion, leading life into an endless future, extending to freedom, broader, and more exciting realms, aUse taste to narrate life, open the door to your happiness!

## SHANGPIN SERIES

Shangpin

### SEAMLESS

The seamless integration of external and internal elements creates a profound sense of harmony. The pursuit of beauty itself is an extraordinary experience, as it encompasses our creative discoveries. Simplicity and refinement, joy in minimalism, and elegance in clarity—this is what life truly embodies. By transcending all noise and chaos, we reach a realm of pure spiritual fulfillment. We meticulously strive to capture and reflect structural beauty from every angle, ensuring that each detail contributes to the overall aesthetic. This philosophy guides our design, making every creation a testament to the art of living.

## PRODUCT REAL

## Authentic Taste

Unearthing the essence of life

The beauty of simplicity should uncover the most fundamental and fulfilling pursuits of human life, a lifestyle that encompasses the essence of living. It requires no carving, no embellishment, and through the long river of history, this pursuit has been polished to a crystalline clarity, exuding a serene tranquility that has weathered the ages. Simplicity does not mean being simplistic; beyond the accumulation of splendor, what remains is a profound depth that is truly awe-inspiring.

# CHAMPION

Advocate of Fashion and Technology

The beauty of products witnesses the brand's promise,  
the beauty of art interprets home trends, and the beauty  
of the brand resonates with spiritual harmony.

## HISTORY

### Modern

Continuing history in another way

The crystallization of inspiration and creativity, using a sculptural exterior to interpret the essence of modern beauty. Simplicity, fashion, and classic moments are forged, showcasing the comfortable texture of life, playing a harmonious avant-garde song, quietly savoring eternal art in dreams.

### 3190 (Simple Luxury Style)

For us, every detail represents a part of a perfect whole. Since ancient times, craftsmen have honed these subtle aspects with their ingenuity. With the advancement of modern technology, we present the concept of craftsmanship in a new way, more perfectly showcasing the millennia-old artisan culture.

## SHAPING TIME

### Shaping

The inheritance of time and era

With a timeless and classical style, our designs transport you across the boundaries of time, immersing you in a perfect fusion of visual and auditory harmony. The delicate lines and elegant structures create an exceptional aesthetic for entryways. The pursuit of beauty itself is an extraordinary experience.

## MASTERPIECE

Luxurious Elegance  
A Masterpiece of Aesthetics

The pursuit of beauty itself is an extraordinary enjoyment, as it encompasses our creative discoveries. Simple yet refined, straightforward yet joyful, concise yet aesthetically rich—this is what life truly is, free from all noise, reaching a realm of pure spirit. We always carefully strive to reflect the beauty of structure from every angle.

In the wave-like information age,  
Have you ever felt lost, unable to  
find your place in the role?  
For a moment, the direction of  
life's choices seems unclear.  
In truth, the journey of life is a  
constant search for the meaning  
of existence.

## LIFE AND ART

Exploration  
The Boundary  
Between Life and Art

Graceful and luxurious, vibrant and lively. Balancing practicality and artistry, humanized design perfectly embodies ergonomics, seamlessly integrating external texture and internal charm, offering a dual enjoyment of fashion and taste. Extracting the essence of Eastern and Western art, breaking through traditional design thinking with unadorned simplicity, it showcases the superior aura of fusion, providing a sense of stability and abundance.

## A TASTE OF THE TIMES

Appreciate  
The prosperity and charm of the era.

The wisdom in simplicity lies in our ability to see more within the minimal. The neat surface design breaks away from the conventional, effortlessly highlighting an industrial vibe. The understated color scheme, devoid of bright decorations, catches the eye. The calm and reserved temperament always evokes the image of a gentleman in a suit, with small accessories adding a touch of inadvertent pride.

**Modern Minimalist Style**

Modern minimalist style is a decoration style that focuses on simplicity. Minimalism originated from Western modernism in the early 20th century. Western modernism traces its roots to the Bauhaus school, founded in 1919 in Weimar, Germany, by Walter Gropius. The Bauhaus school advocated the principle of "function first," proposing furniture designs suitable for assembly line production and promoting simplicity in architectural decoration. The hallmark of minimalist style is the reduction of design elements, colors, lighting, and raw materials to their essentials, while placing high demands on the texture of colors and materials. As a result, minimalist space design is often understated, achieving the effect of "less is more" and simplicity over complexity.

## ARTISAN CULTURE

Tempering  
Polishing the dust of history  
Preserving the modern and the ancient

The crystallization of inspiration and creativity, using a sculptural exterior to interpret the essence of modern beauty. Simplicity, fashion, and timeless moments are forged, showcasing the comfortable texture of life, playing a harmonious avant-garde melody, quietly savoring eternal art in dreams.

## CONDENSATION

Condensing  
The beauty of simplicity and rustic charm

Condensing the art of living space, the entry experience is elevated once again. We explore the most concise design language, using a fresh approach to home design to articulate the concept of entry doors. The grand color scheme and hollow design prevent it from appearing heavy, offering a sense of lightness within its simplicity. With clear textures, modern and classical art represent two distinct directions in exterior design. We re-examine these to achieve a more perfect integration.

The product is finely crafted, understated yet focusing on texture. Rejecting extravagant expressions, using artistic simplicity and innovation to create a low-key luxurious lifestyle that better suits modern people.

Modern minimalism is not about pursuing the most dazzling luxury, nor competing for extreme opulence. It discards complexity and returns to simplicity, allowing one to fully enjoy the nobility and elegance of life.

## Creation • Handwriting

The door is silent, fearless of wind and rain, and steadfastly adheres to its duty. Its appearance is bestowed by the designer. We shouldn't write all kinds of blessing sentences on it, for that's the job of couplets. Because metaphorical blessings have a stronger power of penetration!

## Design • Message

The new artwork of YIHE's Korean-style door, "Purple Qi Coming from the East", has an overall traditional and simple style, fully showcasing the structural layout of the Korean-style door. The unequal purple gold segmentation brings a certain sense of artistry, instantly enhancing the style and making a visual impact. The vivid and flexible design achieves something extraordinary. It implies metaphorically that "purple qi comes from the east, which is a symbol of auspiciousness and beauty", and an abundance of good fortune will descend upon your home.

Every single household door is a form of tribute. It stands there quietly, just like a wise person, indifferent to fame and wealth to clarify one's aspirations, and thus achieves serenity and reaches far-reaching goals.

## CLASSIC SERIES

### Creation • Handwriting

Champagne, wooden tables, to steal the leisure moment for half of a day and pursue a desirable attitude to life; it is full of the strong fragrance of space, which makes people reverie infinitely. Listening to the beautiful piano music, both physically and mentally feel being pleased at the moment.

### Design • Message

The new Korean-style door 'Champagne Time' by YHE features an overall atmospheric and minimalist design, romantic and leisurely, yet modest in style; the main hue of black champagne is blended with fine strands of teak wood grain, making the originally cold steel color suddenly warm and charming; the fashionable fence door decoration is particularly exquisite and sophisticated. Any occasion involving champagne is filled with joy, happiness, and leisurely joyful moments.

Creation • Handwriting

When the spring flowers bloom, everything wakes up. The most popular thing is the green trees and flowers after the baptism of severe cold. It is extraordinarily enchanting and moving, seeing the beautiful life; Showing oneself brings people a little inspiration, and perhaps a little hint.

Design • Message

YIHE's new Korean-style door "Brilliant Purples and Reds" works as a whole reveal of unique warmth. The design technique of light luxury, the line division of the golden ratio, reveal the uniqueness of ingenuity. The matching of shades is in the simplest mode, depicting a hundred flowers in full bloom, purple and red, a scene of spring. Let everyone who goes home feel the infinite possibilities of life.

## CLASSIC SERIES

### Creation • Handwriting

As people begin to grow weary of bustling streets and noisy venues, they start to reflect on life, yearning for simplicity and tranquility, which becomes an inner desire. They are seeking a sanctuary for the soul. Inspired by this, we employ the popular minimalist design approach, using simple lines and expansive gray artistic expressions to offer you an extraordinary visual experience.

### Design • Message

The artwork "Where the Heart Belongs" by YIHE Korean Doors predominantly features a modern, sophisticated gray tone as its main color palette. The use of decorative pillars and horizontal lines adds a touch of refinement and understated luxury to the piece, enhancing its serene and fashionable appeal. The embedded horizontal lines introduce a sense of depth, imbuing the artwork with a compelling allure.

### 3080 (Deluxe Style)

Number One Blessing Under Heaven  
The "Number One Blessing Under Heaven" character for "blessing" subtly incorporates the forms of five characters: "son," "field," "talent," "longevity," and "blessing." It symbolizes "abundant fields, numerous offspring, great talent, long life, and plentiful blessings." From a calligraphic perspective, merging several characters into one while maintaining fluidity and naturalness is exceedingly rare. Even more precious is the fact that this is the only "blessing" in the world that combines the "Five Blessings" and "Blessing and Longevity" into one. It is also known as the "Longevity Blessing" and the "Number One Blessing Under Heaven."

Minimalism has reached its zenith in exploring the essence of things, provoking deep thought, and encouraging tranquility. With simple embellishments and decorations, it leaves more beauty to the temperament and charm that emanate from its minimalist core. By cherishing the aesthetic value of simplicity, it achieves spiritual serenity. This is minimalism—a "presence" born from "absence."

We have always used art to contemplate the deeper layers of life, ensuring that it not only possesses artistic value but also reflects humanistic care. In our use of lines and light, we exercise meticulous precision, striving to showcase structural beauty from every angle. The external texture and internal essence blend seamlessly, perfectly embodying the pinnacle of fashionable taste.

## CLASSIC SERIES

We have always sought new ways to express art and life, striving to transform its abstract beauty into tangible reality. By breaking through traditional design and manufacturing techniques and embracing innovative technological advancements, we push the visual impact of fashion and personalized art to its limits. Visual appeal is never superficial or shallow; it is an introverted temperament and an extension of emotion. A well-rounded visual experience is a profound examination of the art of living. Perfect expressiveness and exceptional stability elevate art once again, embodying both quality and taste.

## CLASSIC SERIES

Simple geometric shapes combine to form classical patterns, blending the old with the new in a harmonious fusion. Spaces composed of different materials intersect and contrast, creating a style that is powerful yet not harsh, vibrant yet not immature. Within the transparent interplay of light and shadow, a living atmosphere is crafted where tradition and modernity coexist in perfect harmony.

## CLASSIC SERIES

The charm of geometry begins with minimalism. The interplay between squares and lines reflects a philosophical and spiritual landscape, elements frequently seen in paintings and often regarded as powerful tools by master architects. Without overwhelming complexity or extravagant exaggeration, the mere combination of points, lines, and planes is sufficiently captivating.

# 96 SERIES ALUMINUM SLIDING DOOR

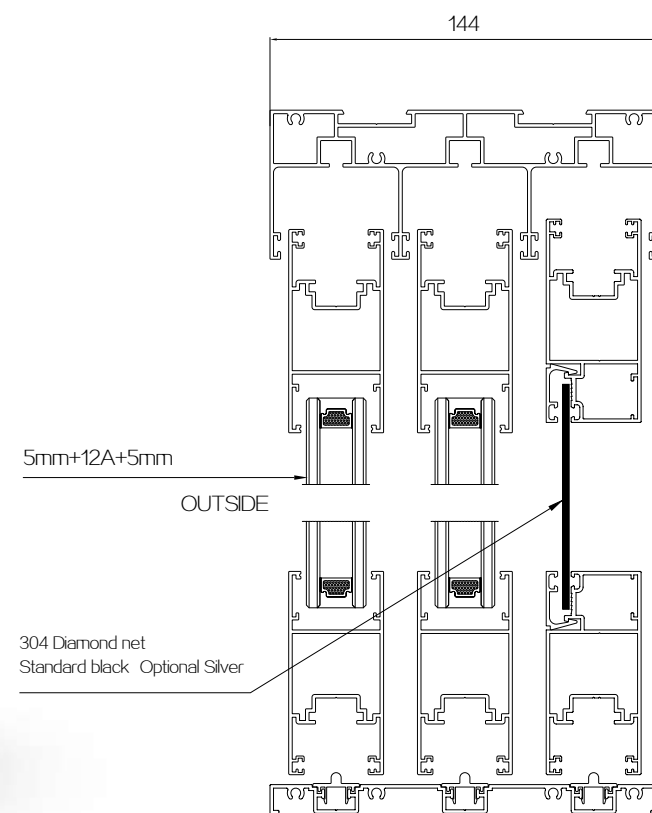

## Space Aesthetics

Space realizes art, and art pursues life simple, bright and elegant,

exuding an uncompromising sense of high-level inside, Outside the window is a jungle-like picture,

and there is a warm and strong fragrance in the room. When you rest, you can recall the time that has passed.

# 130 SERIES ALUMINUM SLIDING DOOR

## Profile thickness:

frame thickness: 1.8mm fan thickness: 1.8mm

## Product configuration:

The maximum size of single fan can be made: fan width ≤ 1500mm, fan height ≤ 2800mm, maximum fan weight: 80kg

## Glass:

5mm+16A+5mm double-layer tempered insulating glass

Material broken edges can be made into double tempered hollow glass of 5MM+27A+5MM

**Grills:** The new 130 series are conventionally square or diamond-shaped large grid strips with 27A hollow strips

**Blinds:** Electric blinds and magnetic blinds are available for the new 130 series

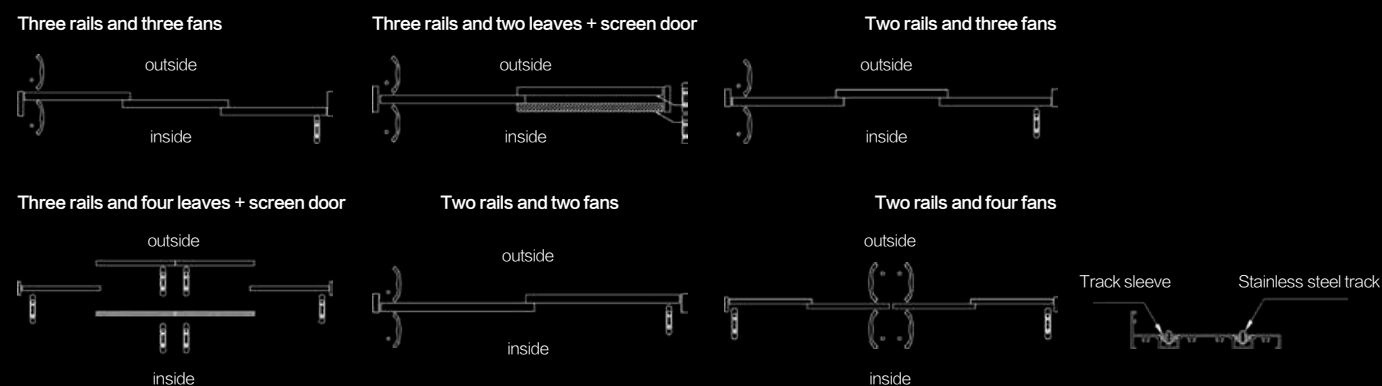

1. 130 series with 304 stainless steel net, standard color is black, silver color is optional
2. Standard stainless steel track for 130 sliding door series track The corner angle can be 90° and 135°

## Basic parameters:

 Thermal insulation coefficient: <b>Uw2.0W/m2K</b>	 Wind pressure resistance coefficient: <b>±2000Pa</b>	 Water tightness coefficient: <b>500Pa</b>
 Air-tightness coefficient: <b>Class 3</b>	 Sound insulation coefficient: <b>Rw up to 25dB</b>	

## Product description:

1. 1.8mm international profile thickness, standard German process design, make the product air tightness, water tightness and wind pressure resistance performance effectively reflected.
2. It can realize the double-track and three-track, and it can be opened flexibly. There are various styles and the design style is simple and atmospheric.
3. The profile design adopts European standard hardware notches and multi-point locks to meet the versatility of accessories on the market and achieve a good anti-theft effect.
4. Complete functions, mosquito net can be placed indoors and outdoors.
5. Hollow glass can be freely equipped with magnetic blinds and electric blinds, realizing two-way selection of daylighting and shading

## PRODUCT DETAILS

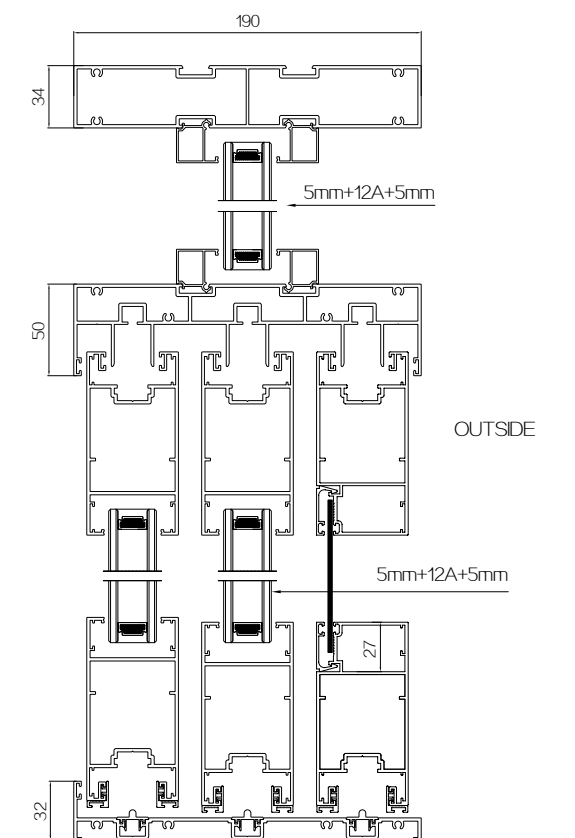

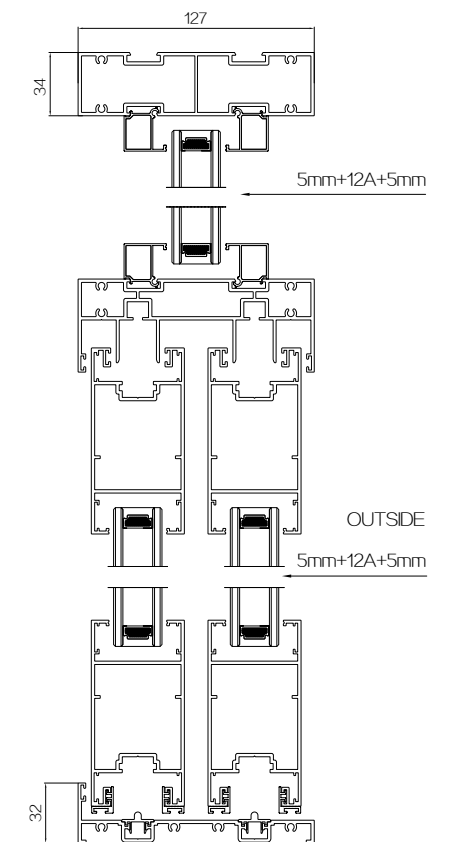

# 130 SERIES ALUMINUM SLIDING DOOR

In terms of professional quality,

the application of artistic aesthetics was entrusted to an environmental manager.

From art to life, follow the inner voice,

return to simplicity and nature, and let life and beauty meet unexpectedly.

# 146 SERIES THERMAL BREAK ALUMINUM LIFTING SLIDING DOOR

## Product specifications:

Profile thickness: 2.0mm

Fan width: 600mm–2000mm    Fan height: 1500mm–3000mm    Maximum load: 100kg

**Standard glass:** 5mm+27A+5mm double-layer tempered insulating glass

**Blinds:** Electric blinds or magnetic blinds

**Insulation strip size:** 20mm

## Basic parameters:

Thermal insulation performance:  
**Uw1.7W/m2K**

Wind pressure resistance performance:  
**5000Pa**

Air-tightness coefficient:  
**level 3**

Sound insulation performance:  
**Rw35dB**

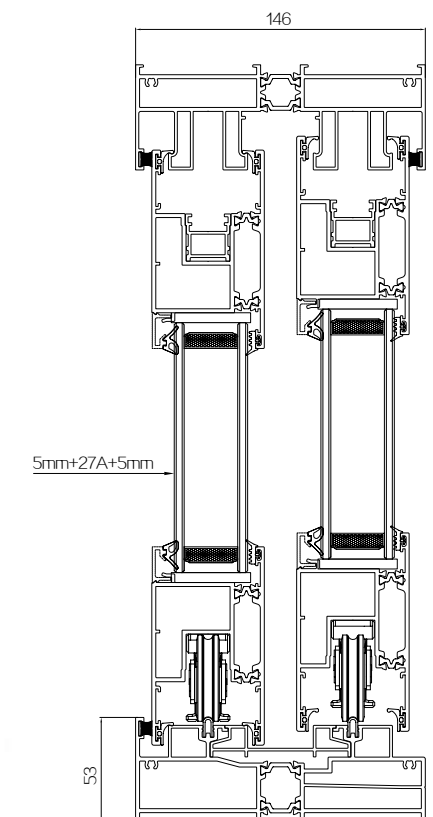

Watertight performance:  
**500Pa**

## Product description:

1. All sides of the door leaf and the frame body are sealed with rubber strips, and the connection between the outer frame and the upper and lower rails is sealed with waterproof plugs, waterproof gaskets and other seals, and the watertight performance is more than 500Pa.
2. The door leaf hook uses a plastic cover to divide the hook into two parts. The door frame uses a plastic plate insert to separate the door leaf from inside and outside to achieve separation between the inside and the outside. Control it below 1.7.
3. The frame and fan adopt the embedded structure, and the thickness of the profile is 2.0mm. In a single fan of 1.8 square meters, the wind pressure resistance value of the additional sleeve core can reach 5000PA.
4. It can be used for lifting sliding door, fixed door, ordinary sliding and other design, and also be used as a magnetic levitation electric sliding door.
5. The glass can be loaded and unloaded by laminating strips, which reduces difficulties in transportation and replacement of glass.

---

# ALUMINUM

## HEAVY LIFTING SLIDING DOOR

1. The lifting sliding door system adopts the principle of lever, by gently turning the handle to control the lifting of the door leaf.
2. When the handle is rotated downward, the door leaf is opened and fixed by the driver connected to it,
3. Make the pulley fall on the track of the lower frame, and drive the door leaf up, at this time the door leaf is open (freely sliding and sliding)
4. When the handle rotates upwards, the pulley is separated from the sliding track, and the door leaf is lowered.
5. The door leaf presses the rubber strip on the door frame under the action of gravity, and the door leaf is closed at this time.

# 170 SERIES ALUMINUM LIFTING SLIDING DOOR

## Product specifications:

Profile thickness : frame 2.2mm , fan 2.2mm , high track / low track 2.2mm

Fan width : 600mm-2000mm Fan height : 1500mm-2600mm

**Standard glass:** 5mm+12A+5mm+12A+5mm , triple-layer tempered insulating glass

**Profile width :** frame width 170mm , thermal insulation strip 40mm fan width 80mm , thermal insulation strip 33mm

**Visible surface :** upper track 56mm , thermal insulation strip 44mm , bottom track 50mm , thermal insulation strip 30mm

## Basic parameters:

Thermal insulation performance:  
**level 8** ( $1.6 \geq K \geq 1.3$ )

Wind pressure resistance performance:  
**level 3** ( $2.0 < P3 < 2.5$ )

Air-tightness coefficient:  
**level 5** ( $2.0 \geq q1 \geq 1.5$ )

Sound insulation performance:  
**level 3** ( $30 \leq Rw+Ctr < 35$ )

Watertight performance:  
**level 4** ( $350 \leq Pa < 500$ )

## Product description:

1. Double track lifting sliding construction, strong and durable, can meet the needs of large size heavy lifting sliding door
2. The installation of a unique U-shaped groove makes hygiene cleaning more convenient and the overall more beautiful, and the design of its elastic mouth makes the sealing performance better.
3. Using the principle of equal pressure and a unique drainage structure, the sliding door is designed with reasonable drainage channels, completely avoiding the possible rainwater flow into the room and the phenomenon of water in the track.
4. Flexible opening mode, larger single door design, better interior landscape, all-round improvement of building and life quality;
5. The profile section is larger, using different thickness of insulating glass and multi-cavity heat-insulating aluminium profiles, with high tensile and bending strength, stable performance, not easy to ageing, long service life;

## HARDWARE CONFIGURATION

# 170 SERIES ALUMINUM LIFTING SLIDING DOOR

## Product details

# 190 SERIES

## HEAVY LIFTING SYSTEM SLIDING DOOR SERIES

### TECHNICAL PARAMETER

**Profile thickness:** 6060-T66 aluminum/wall thickness 3.0mm

**Heat insulation strip:** PA6-GF25-GB/T23615 high quality insulation strip

**Visible surface:** side frame 45mm/light positive surface 68mm/narrow side width:32mm

**Size specification:** sash width:600-2000mm sash high:1500mm-2600mm

**Glass specification:** 5mm+27A+5mm double layer tempered middle space glass

**Opening method:** Normal sliding,electric smart sliding,lifting system sliding

#### Basic parameters:

Heat insulation performance  
Level 8 ( $1.6 \geq K \geq 1.3$ )

Wind pressure resistance performance:  
Level 3 ( $2.0 < P3 < 2.5$ )

Air-tightness coefficient:  
Level 5 ( $2.0 \geq q1 \geq 1.5$ )

Sound insulation performance:  
Level 3 ( $30 \leq Rw+Ctr < 35$ )

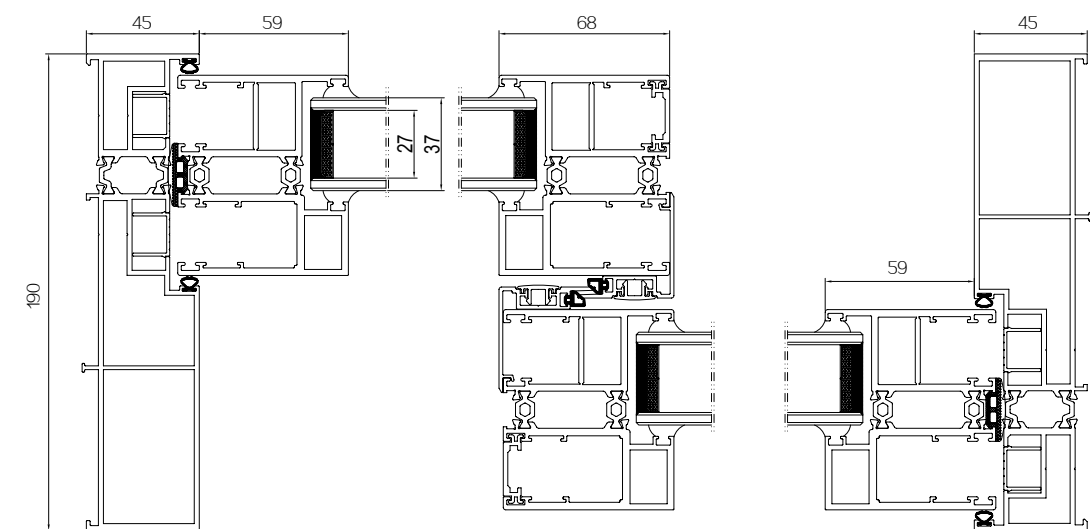

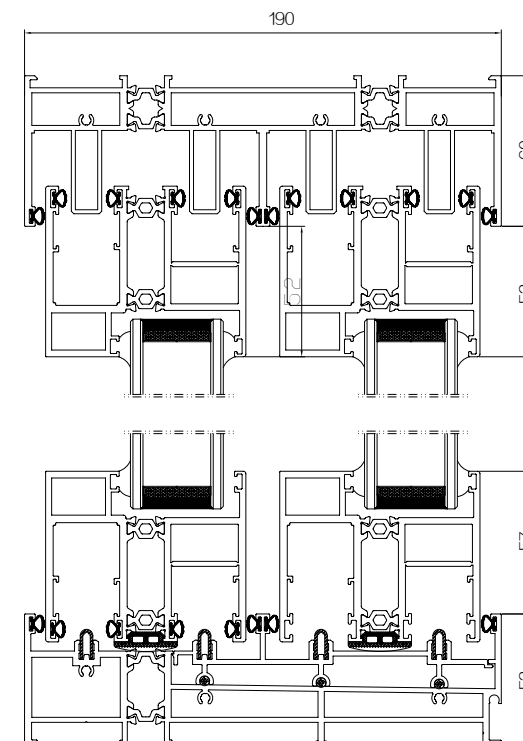

Watertight performance:  
Level 4 ( $350 \leq Pa < 500$ )

#### Product description:

1. Thermal break structure design, accomplish high insulation performance.
2. Double lifting system, with specialize sealing rubber and low friction rubber cooperate, accomplish high airtight watertight and insulation performance.
3. High eight support bottom roller, and single panel double row roller specification structure design, accomplish larger door panel production, satisfy the requirements of users of larger viewing fans.
4. Largest single panel can make 9 square meters, two bottom rail drainage water plan, specific drainage water design, outside install water pipe design, satisfy different scenes and drainage requirement, make the products excellent watertight performance.
5. Narrow side hook and enhanced narrow side hook design, accomplish large side full view sliding door effect, view without boundaries.

# 190 HEAVY LIFTING SYSTEM SLIDING DOOR SERIES

## TECHNICAL PARAMETER

# 73-65 SERIES THERMAL BREAK ALUMINUM HEAVY DUTY FOLDING DOOR

## Product specifications:

The outer frame occupies the wall thickness 73mm, the thickness of glass panel is 65mm

**Profile thickness:** Frame: 1.6mm; Panel: 2.0mm

**Width Singular panel:** 500mm-900mm      **Width of even panel:** 500mm-950mm

**Height of panel:** 1000mm-3200mm; Maximum bearing      **Capacity:** 100kg

## Standard glass:

5mm+24A+5mm, double tempered insulating glass

## Basic parameters:

Heat insulation performance  
Grade 7 ( $2.0 \geq K \geq 1.6$ )

Wind pressure resistance performance:  
Grade 3 ( $2.0 \leq P3 \leq 2.5$ )

Air-tightness coefficient:  
Level 4 ( $2.5 \geq q1 \geq 2.0$ )

Sound insulation performance:  
Level 3 ( $30 \leq Rw+Ctr \leq 35$ )

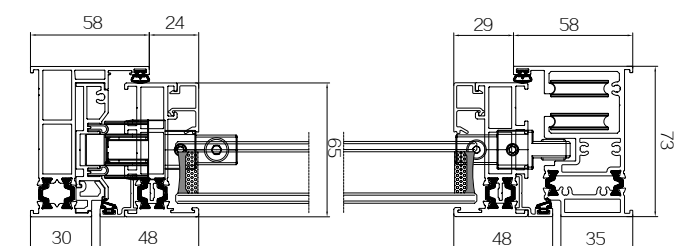

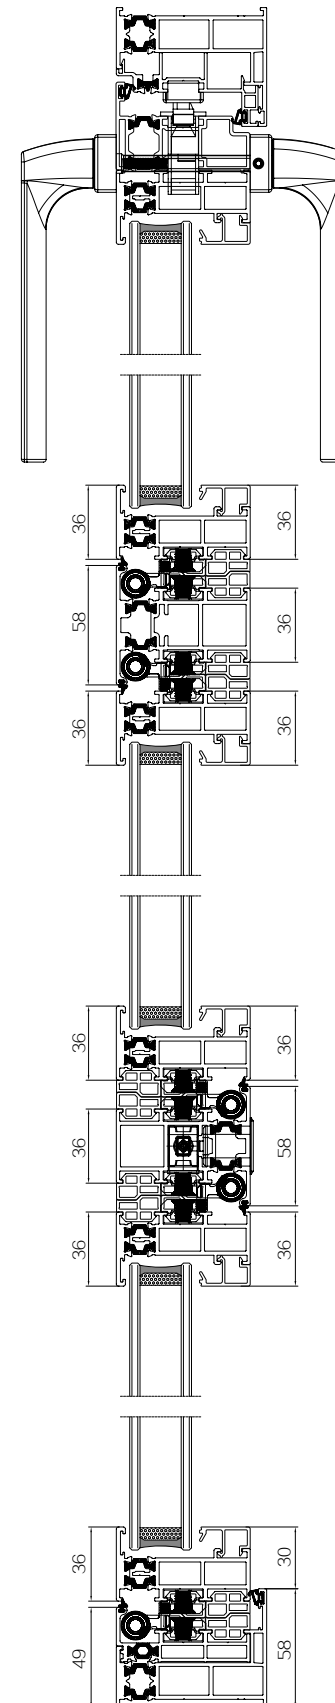

Watertight performance:  
Level 3 ( $250 \leq Pa \leq 350$ )

## Product description:

1. The middle column between the door fan and the door fan is connected, and the hinge is cleverly hidden. At the same time, the hinge design can adjust the gap between the fan and the fan, and the site installation is more convenient.
2. Anti-clamping design is adopted between the door fan and the middle column, which gives customers a good hand feeling and ensures the safety of use.
3. The door fan is designed to cover the edge of the water, so that the door fan is closely pressed together with the surrounding frame in the closed state, effectively enhancing the water tightness and wind pressure resistance.
4. It can be equipped with barrier-free low rail, high rail, flat rail and other lower rails to meet different customer application requirements.
5. The glass notch of the door door adopts large hollow design, which makes the large hollow glass more sound insulation.
6. Single rail design is adopted, the door can be 3.2 meters high, double rail bearing is more safe and durable.
7. Folding door can be fully opened, good ventilation effect, wider vision. Can do any combination folding number folding door, can do free folding door combination.

# 73-65 SERIES THERMAL BREAK ALUMINUM HEAVY DUTY FOLDING DOOR

PRODUCT DETAILS

# 75 SERIES ALUMINUM FOLDING DOOR

## Profile thickness:

frame thickness: 1.8mm Fan thickness: 1.8mm

## Specification:

Fan width: 650mm-900mm Fan height: 1500mm-3000mm Maximum fan load: 100kg

## Glass:

5mm+27A+5mm double tempered(single glass notch is 13mm)

## Grills:

75 folding door series are normally square grills or diamond grills (27A hollow)

## Blinds:

magnetic control Blinds and electric Blinds

## Basic parameters:

Thermal insulation performance:  
**Uw3.5W/m2K**

Wind pressure resistance performance:  
**+2000Pa**

Air-tightness coefficient:  
**level 4**

Sound insulation performance:  
**Rw up to 25dB**

Watertight performance:  
**+400Pa**

Standard 304 stainless steel track

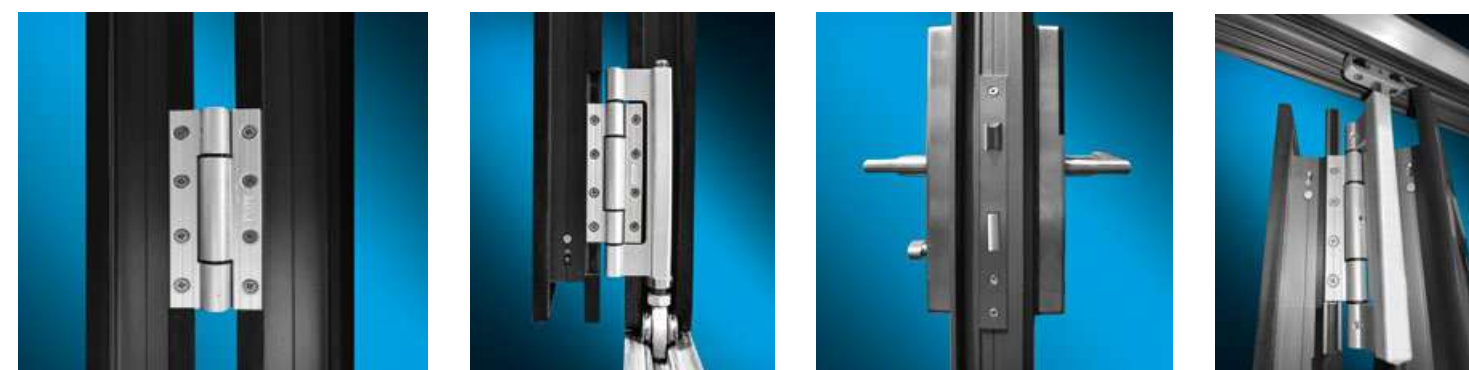

## Product description:

- 6063-T5 profile has high strength, sound insulation and excellent safety performance.
- Excellent anti-corrosion performance, not easy to stick to dust and scale, super long weather resistance, shelf life  $\geq 20$  years.
- Using high-quality stainless steel guide rails, higher strength, longer life, and less movement resistance.
- The door leaf breaks through the traditional limitation that it can only be opened by half. It can be fully opened and moved to both sides to be folded in sequence to maximize the ventilation area.
- High load-bearing single-row deep groove ball bearings are used inside the pulleys, which have low resistance, light and stable operation, wear resistance, and long product life.
- The foldable design makes the open space reach the maximum limit, can fully see the external landscape, makes the indoor and outdoor unobstructed, and has a wide field of vision.
- The profile adopts EPDM sealing tape, which is not easy to age, more durable, and achieves a more comprehensive sealing effect.

# 75 SERIES ALUMINUM FOLDING DOOR

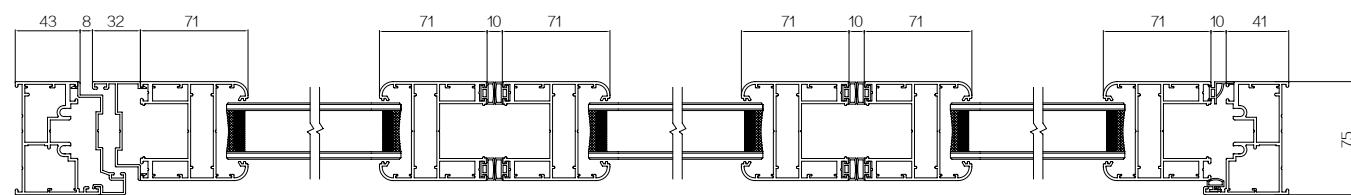

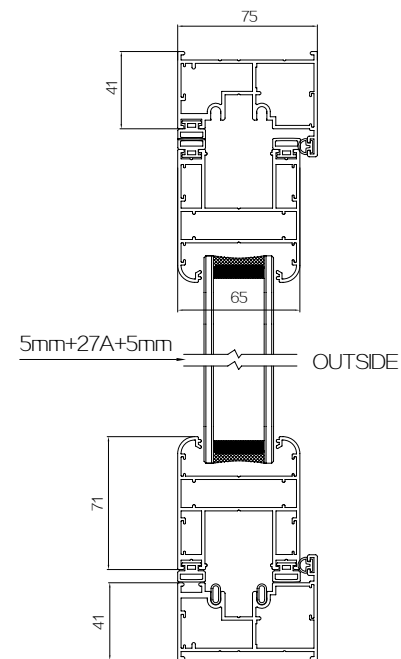

## Product details

## 75 SERIES ALUMINUM FOLDING DOOR

OUTSIDE

## Folding door features

After the folding door is unfolded, it can be pushed to the end, occupying very little side space and saving a lot of space.

And the light will not be blocked, which can make the house brighter and have a wider view.

# 88 SERIES THERMAL BREAK ALUMINUM FOLDING DOOR

## Technical Parameters:

Profile: thickness 2.0mm local reinforcement 2.2mm

**Size range:** fan width: 500mm-900mm fan height: 1900mm-3000mm

**Glass specification:** 5+27A+5mm double tempered insulating glass

## Profile thickness:

Frame thickness: 97mm Heat insulation strip: 20mm panel thickness: 88mm Heat insulation strip: 24mm

**Visible surface:** frame 43mm / opening fan 60mm

## Basic parameters:

Insulation performance  
Grade 8 ( $1.6 \geq K \geq 1.3$ )

Wind pressure resistance performance:  
Level 3 ( $2.0 < P3 < 2.5$ )

Air-tightness coefficient:  
Level 4 ( $2.5 \geq q_i \geq 2.0$ )

Sound insulation performance:  
Level 3 ( $30 \leq R_w + C_{tr} < 35$ )

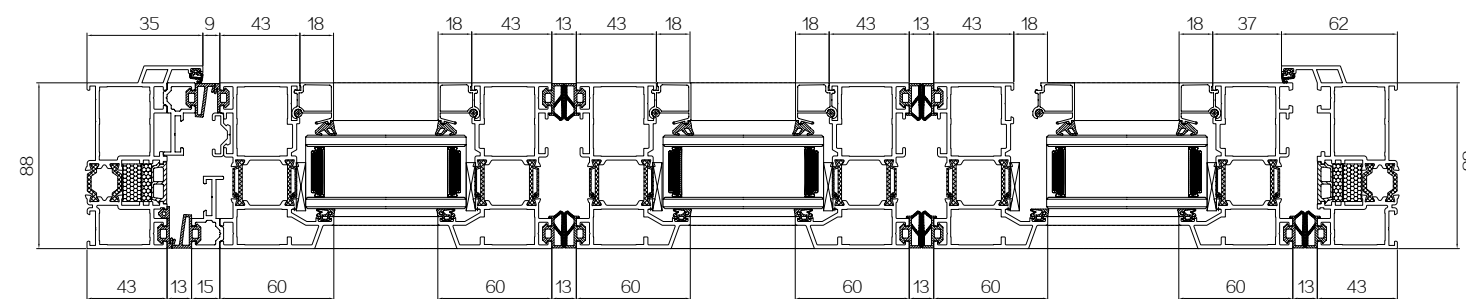

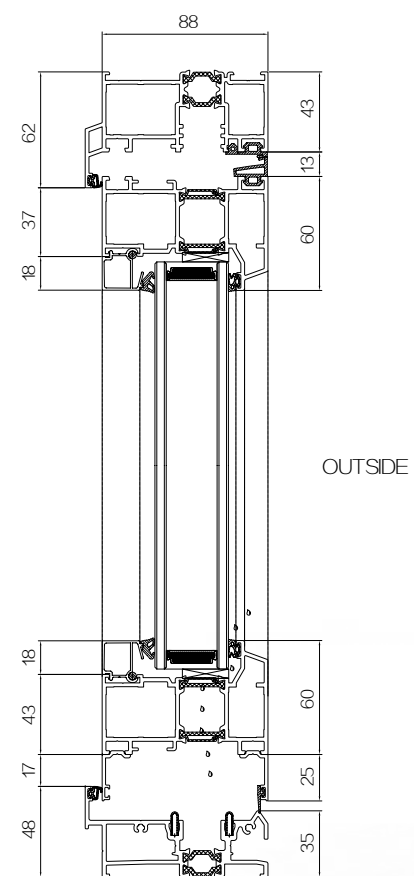

Watertight performance:  
Level 3 ( $250 \leq P_a < 350$ )

## Product description:

1. Less types of profiles, high versatility, lower mold and production costs;
2. The visible surface is small, the visible surface of the frame profile is 61.5mm, the visible surface of the fan profile is 60.5mm, and the visible surface of the threshold is 48mm. Taking the 431-style folding door as an example, in the fully opened state, the visible surface of the three door leaves is only 257.2mm;
3. The combination of adjustable and non-adjustable hinges, the combination of heaven and earth bolts and multi-lock point locking, stable locking, efficient assembly, and simple construction;
4. Built-in track and lower load-bearing structure, the center of gravity of the fan is centered, and various opening forms: 330, 431, 550, 633, 651, 770, 871, 853 and other forms, with a width of up to 7.2 meters;
5. Multi-channel sealing rubber strips are used at the frame fan, and sealing rubber strips are also added at the hinges to form a continuous seal together with the frame fan sealing rubber strips. There are also special rubber strip plugs and other accessories to improve the sealing effect and hide Type drainage and equal pressure design to achieve high watertightness (6 grades) and airtightness (8 grades), which can meet the use requirements of most places;
6. The sill connector improves the stability and efficiency of assembling the sill and the door frame, and at the same time, it is designed with a drainage channel, which cooperates with the hidden drainage and equal pressure design, effectively ensuring the drainage effect and appearance;
7. There is a 13mm gap between the fan and the frame, and between the fan and the fan. Even if an adult's finger is caught, it will not cause pinch injury. It has anti-pinch function and humanized safety design.

# 88 SERIES THERMAL BREAK ALUMINUM FOLDING DOOR

## Product details

# 68 SERIES THERMAL BREAK ALUMINUM FOLDING DOOR

## Profile thickness:

Frame thickness: 2.0mm Fan thickness: 2.0mm

Fan width: 650mm-1000mm Fan height: 900mm-3500mm Maximum weight of single glass fan: 100kg

**Glass:** 5mm+27A+5mm double-layer tempered hollow glass Insulation strip size: 14.8mm.

**Grills:** diamond grills and square grills

**Blinds:** Electric Blinds and magnetic control Blinds

## Basic parameters:

Thermal insulation coefficient:  
**Uw2.0W/m2K**

Wind pressure resistance performance:  
**+2500Pa**

Air-tightness coefficient:  
**level 5**

Sound insulation performance:  
**Rw up to 30dB**

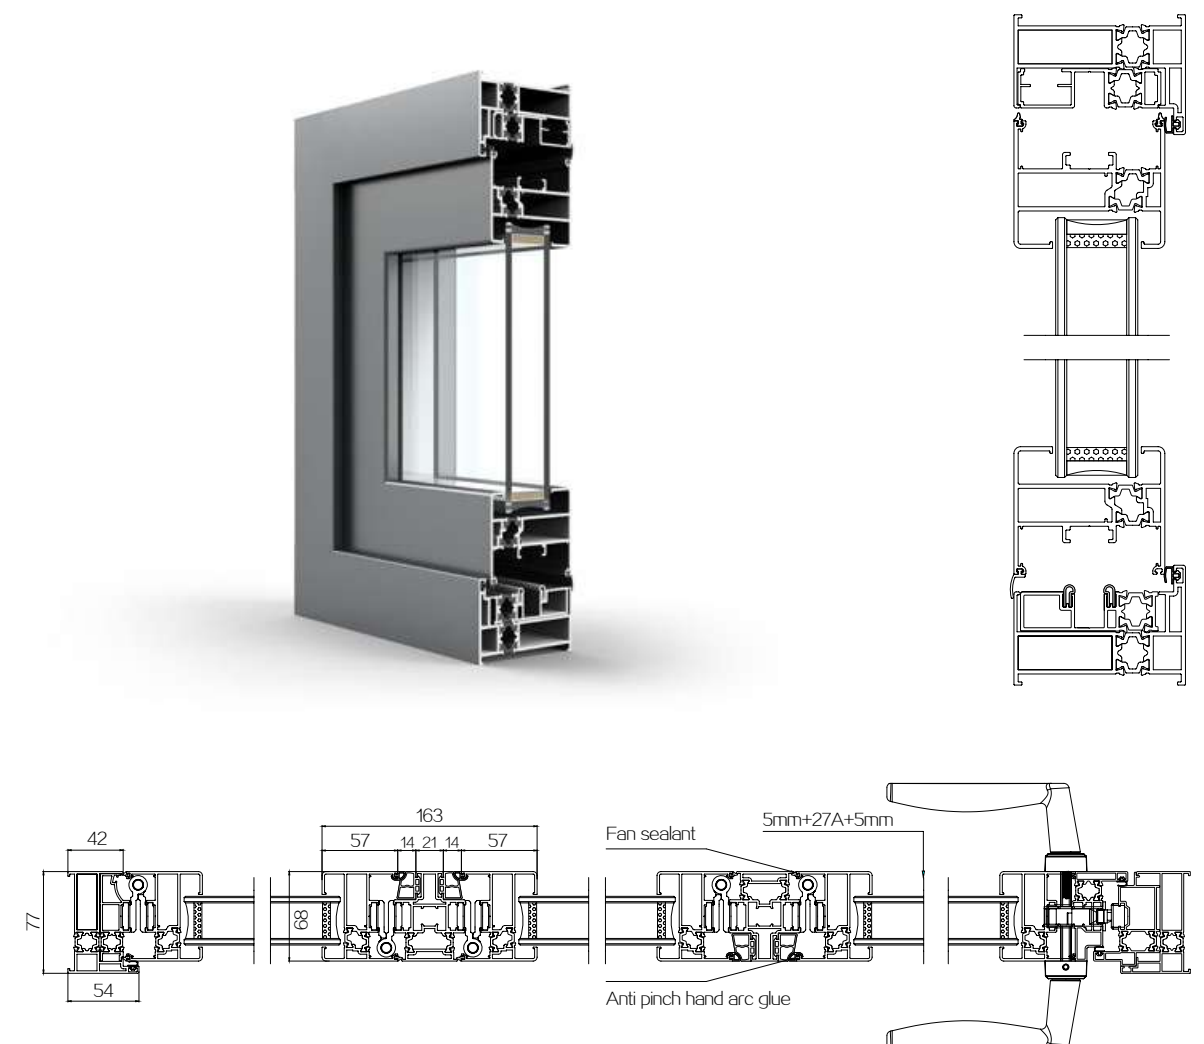

Watertight performance:  
**+500Pa**

## Product description:

1. The profile fan thickness is 68mm, and the visible surface of the door leaf is 140mm after closing.
2. The upper part adopts the bearing design of the positioning pulley block, and the lower part adopts the load-bearing pulley block, which has higher safety performance.
3. Perfect sealing structure design, a variety of door and window types are available, folding fans can be odd and even; more doors can be freely folded left and right, concise and bright.
4. Arc-shaped sealant is installed between the door leaf and the center column to prevent hands from being caught when pushing the door.
5. The lower wheel of super load-bearing bearing adopts high load-bearing single-row deep groove ball bearing inside the pulley, which has low resistance, light and stable operation, wear resistance and long product life.
6. The profile adopts EPDM sealing tape, which is not easy to age, more durable, and achieves a more comprehensive sealing effect.
7. Profiles and hardware doors and windows are common, door leaves can be combined at will 440/422/431/330/321, etc.

# 68 SERIES THERMAL BREAK ALUMINUM FOLDING DOOR

# “ ALUMINIUM SWING HANDLE

## PRODUCT DETAILS

Fully automatic locking function of door leaf,  
Strict protection to reduce hidden dangers.

## Folding door hinge details

# 50 SERIES ALUMINUM CASEMENT DOOR

## Profile thickness:

sash thickness: 1.4mm    door thickness: 1.8mm    Frame thickness: 1.4mm

## Tilt and turn window:

Fan width: 520mm-800mm    Fan height: 700mm-1500mm    Maximum fan load: 60kg

## Casement window:

Fan width: 400mm-800mm    Fan height: 700mm-1500mm    Maximum fan load: 60kg

## When the 50 series is used for casement doors:

Width: 600mm-900mm    Height: 1800mm-2400mm

**Glass:** 5mm+6A+5mm double tempered glass

In the case of broken edges, it can make up to 5mm+19A+5mm double tempered insulating glass

## Grills :

normal is falt grill (6A or 9A hollow)or square large grill (19A hollow)

**Blinds:** magnetic control Blinds

The corner angle can be 90° and 135°

## Basic parameters:

Thermal insulation coefficient:  
**Uw4.0W/ m² K**

Wind pressure resistance  
**2000Pa**

Water tightness:  
**300Pa**

Air tightness:  
**Class 3**

Sound insulation performance:  
**25dB**

## Product description:

- 1.The wall thickness of the standard profile is 1.4mm, and the design adopts the European standard notch to meet the versatility of accessories on the market.Easy to use, flexible, more space-saving, large opening area, wide field of vision, and more conducive to air convection.
- 2.The door leaf is beautifully designed and suitable for high-end villas, residences and clubs.
- 3.The opening style can be done: outside opening window, inside opening window, Tilt and turn window, top hung window;single casement door, double casement door.

## HARDWARE CONFIGURATION

— Wind bracing —

— Lock cylinder —

— Drive rod - lock seat - lock point - connector —

— Transmission box —

— Lock cylinder cover —

— Hinge —

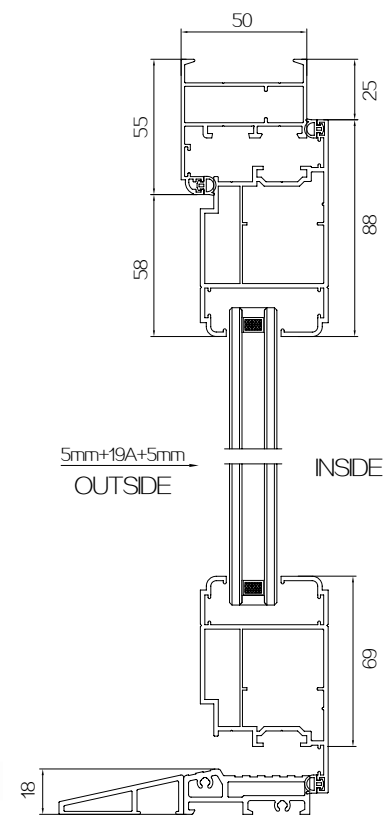

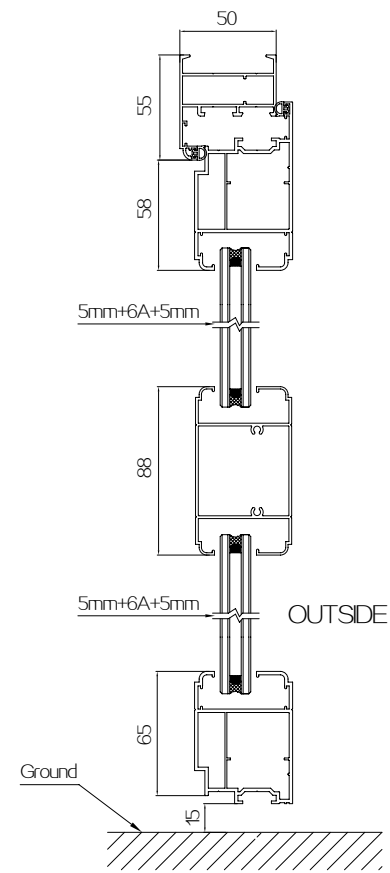

— Handle —

— Handle —

# 50 SERIES ALUMINUM CASEMENT DOOR

# 75 SERIES THERMAL BREAK SPRING DOOR

## Technical Parameters:

### Profile thickness:

6063-T5 grade aluminum alloy / thickness 2.3mm

**Heat insulation strip:** PA66-GF25-S20 high-quality heat insulation strip

**Profile width:** frame thickness 75mm, heat insulation strip 20mm; fan thickness 75mm, heat insulation strip 20mm;

**Visible surface:** frame 40mm / sash center column 26mm / opening sash 60mm, 80mm

**Dimensions:** panel width: 800mm-1000mm    panel height: 2000mm-2600mm    maximum fan weight: 130kg

**Glass specification:** 5mm+27A+5mm / 5mm+19A+5mm double-layer tempered insulating glass

## Basic parameters:

Thermal insulation coefficient:  
**Uw2.5W/m<sup>2</sup>K**

Wind pressure resistance coefficient:  
**+2500Pa**

Water tightness coefficient:  
**+500Pa**

Air tightness coefficient:  
**Level 5**

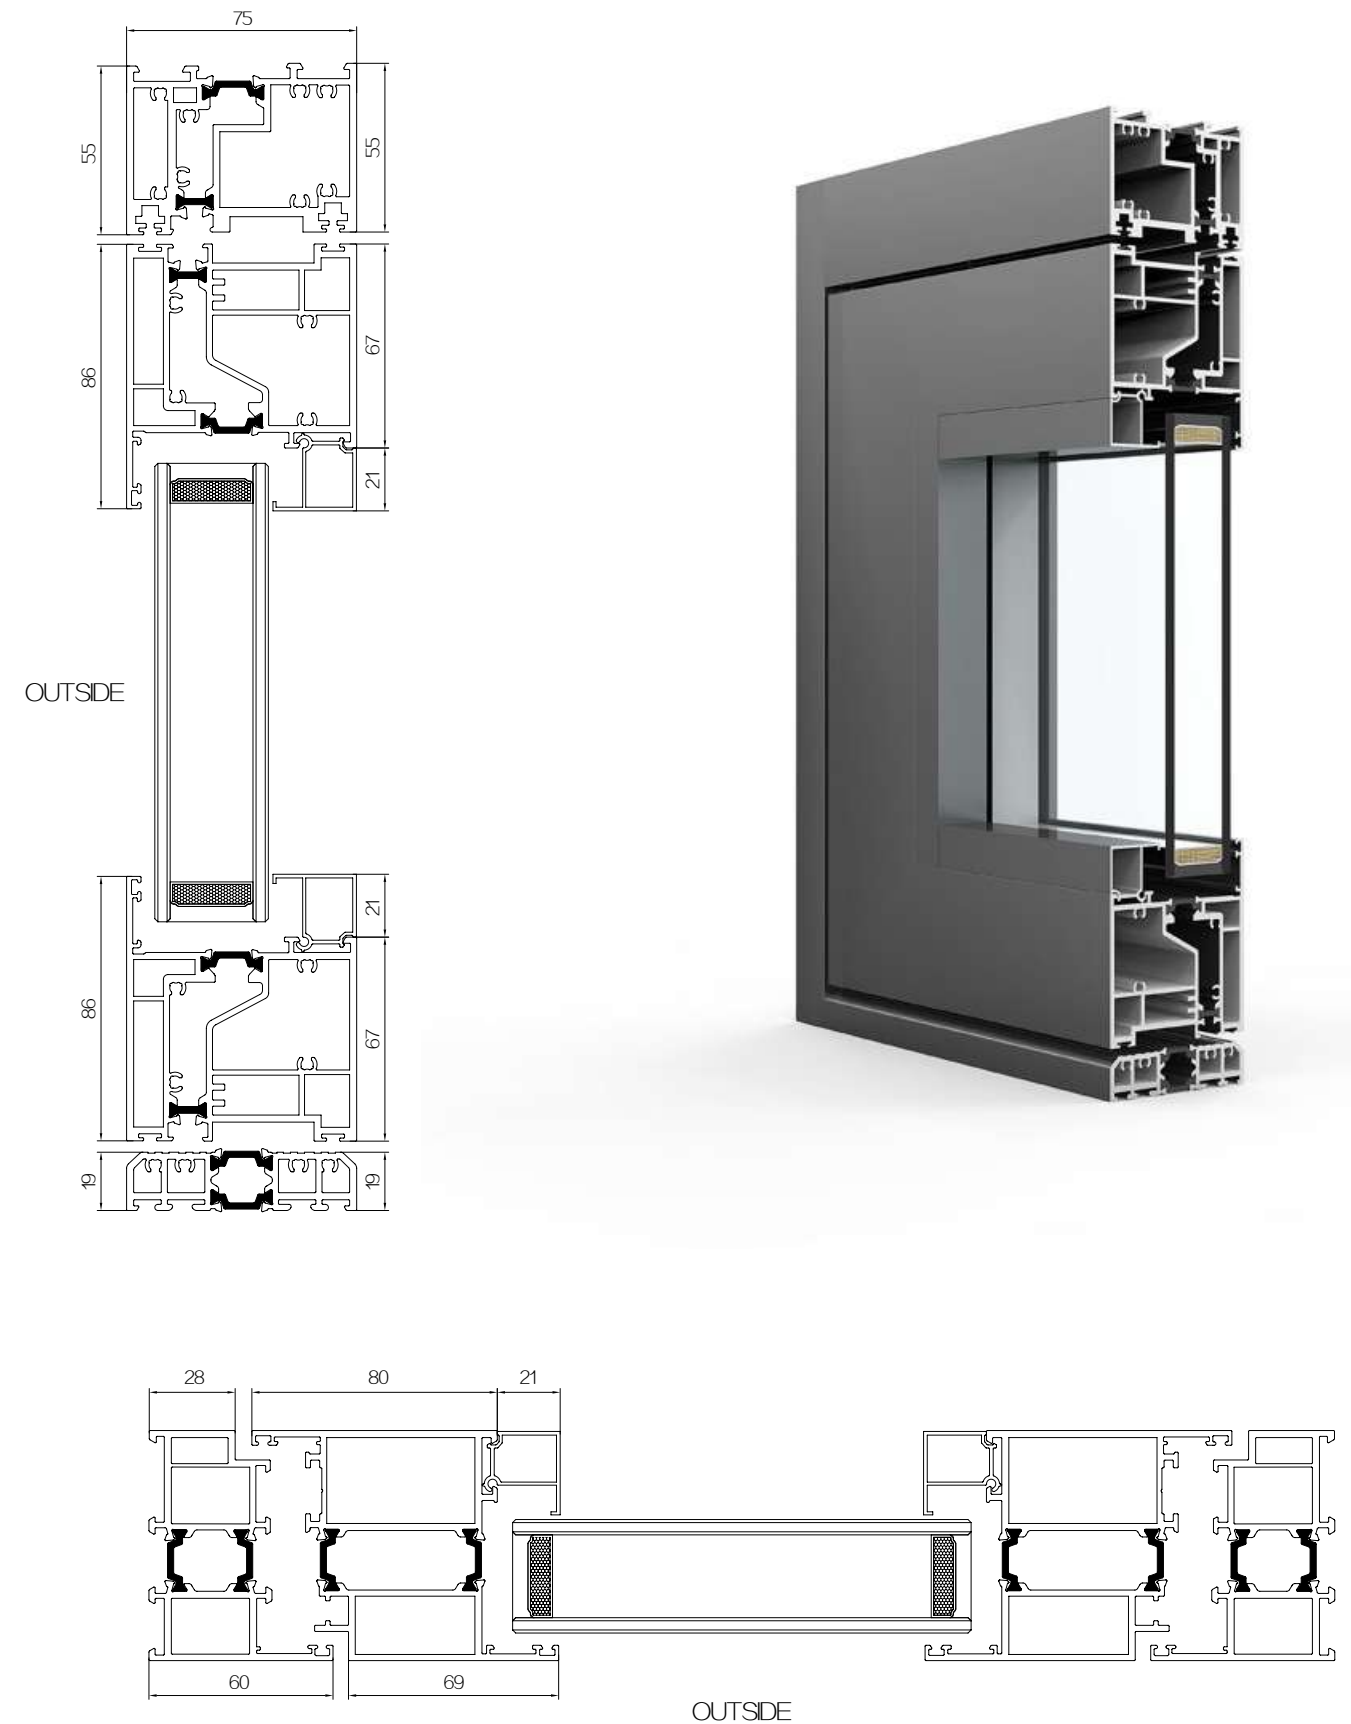

Sound insulation coefficient:  
**Rw up to 30dB**

## Product description:

1. The noise of opening and closing is small, and the walls on both sides of the door opening can not be occupied. The service life is long, and the heat preservation and dustproof performance are relatively good. It is suitable for various high, medium and low-grade decorative doors.
2. The frame and material of the door leaf are designed as a rectangular cavity, which is more firmly connected and more stable in structure. Combined with the double-layer insulating glass design, it is not only compact in structure, but also has good sound insulation and impact resistance, and is very solid and durable.
3. The door leaf adopts a flush design on all sides, with 19A/27A rectangular pressure line, which is not easy to deform. There is a sealing strip built into the C groove, which has better sealing performance, can effectively reduce the sound wave resonance, and has a good sound insulation and heat insulation effect.
4. The insulating glass can be freely equipped with magnetically controlled hollow louvers and electric louvers to realize two-way selection of lighting and shading.

# 75 SERIES THERMAL BREAK SPRING DOOR

## Product Features

---

The door leaf adopts a flush design on all sides, with 19A/27A rectangular pressure line, which is not easy to deform. There is a sealing strip built into the C groove, which has better sealing performance, can effectively reduce the sound wave resonance, and has a good sound insulation and heat insulation effect.

**75** SERIES  
THERMAL BREAK SPRING DOOR

---

**18** SERIES  
SLIM FRAME ALUMINUM CASEMENT DOOR

**Processing dimensions of doors and windows:**

Width : 817mm Height : 1925mm

**Glass:** 5mm frosted glass + 15A + 5mm Changhong glass

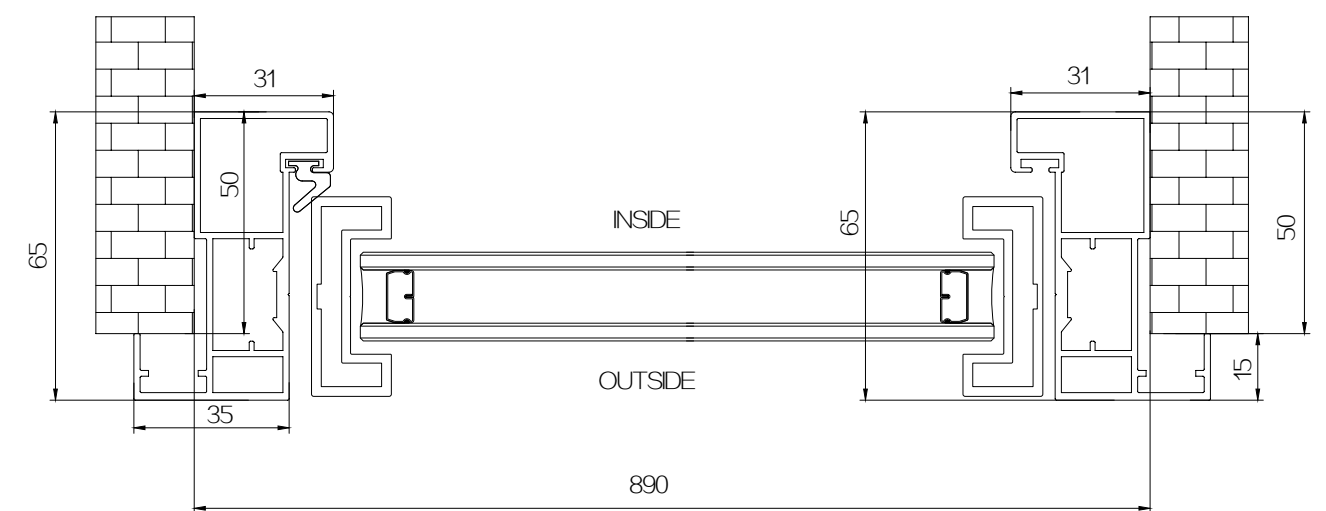

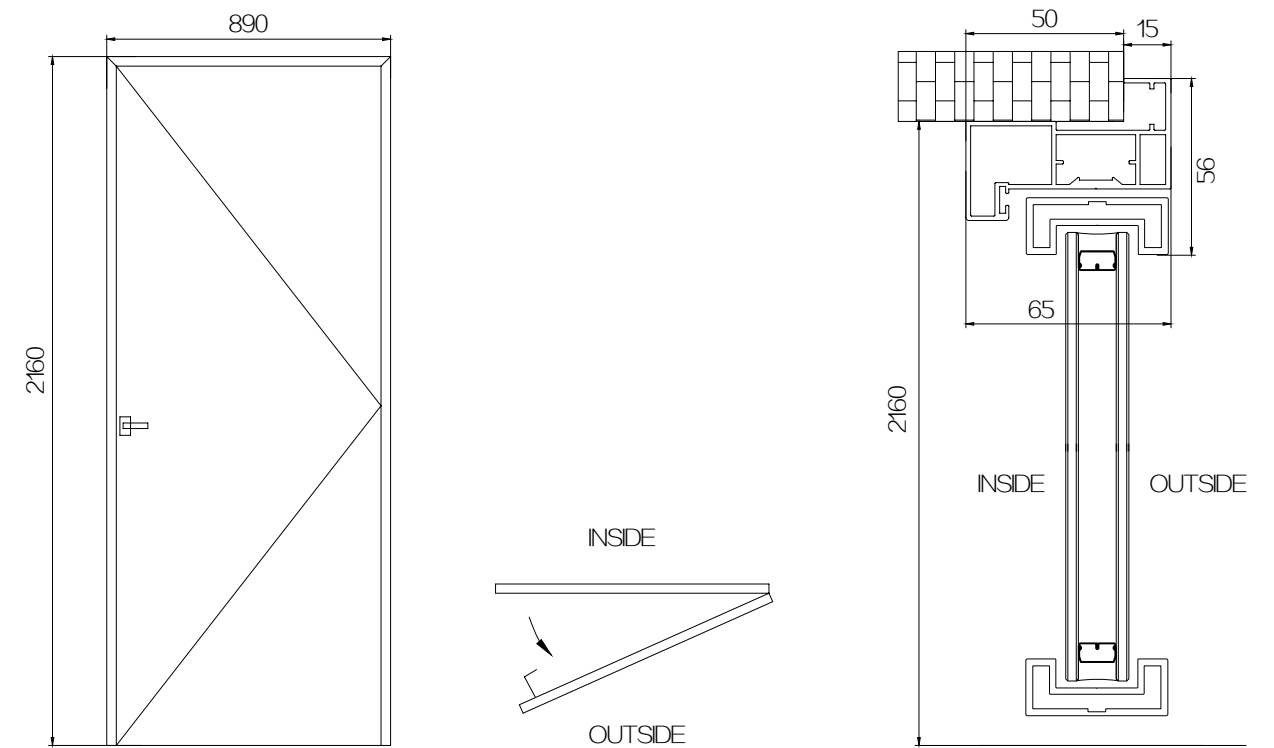

The glass frosting surface is on the indoor surface; Changhong glass is outside the room.

The concave convex surface of Changhong glass is made in the hollow layer.

**Package:** Double clad mode, wall thickness 190mm.

**Remarks:** Lifting leg 10mm; The standard configuration lock adopts square lock (magnetic suction mode)

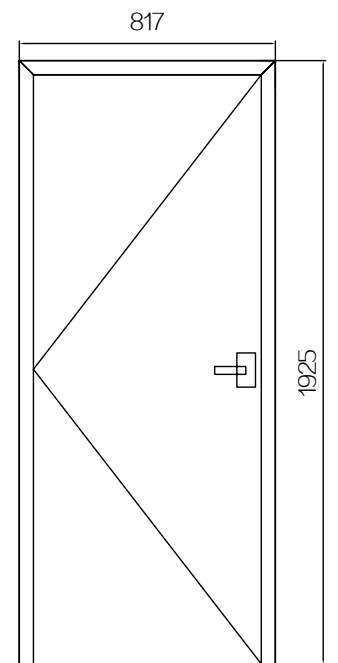

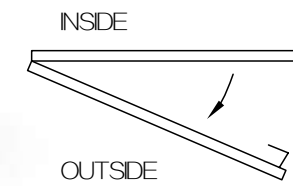

**18** SERIES SLIM FRAME ALUMINUM CASEMENT DOOR

**18** SERIES  
SLIM FRAME ALUMINUM CASEMENT DOOR

Double jacket

Remarks: lifting leg 10mm
