ENGINEERED WOOD PANEL DOOR

PD-01

Engineered wood panels doors are constructed with stiles, rails, panels, and sticking. We have different sharps of sticking, and also give both options of flat and raised panels. These doors are assembled with stable structure and nice joints. Well controlled moisture content and good materials keep them from risk of cracking, and give people guarantee of 500,000 cycles of opening.

HOLLOW CORE SHAKER DOORS

These new designed hollow core shaker doors became very popular once it's developed. It gives another option to shaker doors and make them affordable with honeycomb infilling. For area where sound control is important, we also have another option particle board core. Smooth white primed finishing allow people to paint it to any color they want or just keep it to save the cost and time.

LAMINATE DOOR

Laminate doors are typically specified for their aesthetically uniform appearance. Hundreds of solid color, various pattern and wood grain options are available. High Pressure Laminate and melamine door faces help resist shock, denting and scratching. Because of their durability and ease of cleaning, they are a popular choice and widely used for medical buildings, schools and universities, government facilities and hotels.
