CDZ-01

PRODUCT PARAMETERS

Material:
 Main body: stainless steel
 Showers: ABS
 Water outlet of the showers: silicone
 Straight tube and bended pipe: stainless steel
 Outlet tube: PVC

Top shower: $\phi 250\text{mm}$
 Hand shower: $250 \times 115\text{mm}$
 External thread: G1/2B
 Water inlet opening to the fixing seat: 1125mm
 Water inlet opening to the highest point: 950-1250mm
 Water inlet opening to the surface of the shower: 870-1170mm
 Distance between the shower outlet and the wall: 450mm

Color: black, gunmetal, bright silver, white

Color:
WHITE.

Color:
GUNMETAL.

Color:
BRIGHT SILVER.

Color:
BLACK.

BIONIC RAIN SHOWER

Three times bigger than the ordinary shower top sprayer, with a wide water outlet area. The water outlet angle can be adjusted at will and can be started with one key. The water coming out of the double water spray super large shower is a bionic rain shower from nature, which imitates the natural rain falling effect. Combined with the large spray aperture, the water coming out of the shower is soft and delicate, and the strength is even and soft. When using silicone water outlet, the water outlet nozzle is not easy to deform, the scale is clean once kneaded, and it is not easy to change color after long use.

FREELY ADJUSTABLE DESIGN

With the adjustable design in horizontal and vertical directions, the vertical height of the shower column can be expanded by up to 30cm, and the horizontal height can be expanded by 15cm to meet the diversified bathroom space needs.

Rainforest moisturizing water outlet mode, particle pressurization pulse water outlet mode and mixed water outlet mode can be switched at will.

Mixed water outlet mode can be switched at will.

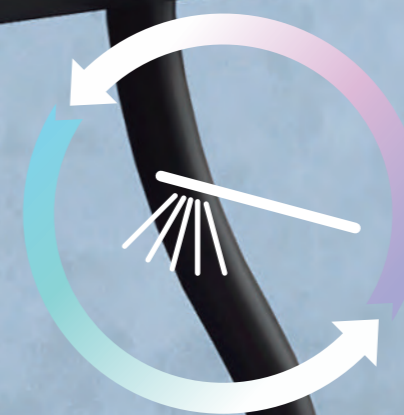

ZINC ALLOY SCALD PROOF FAUCET PROTECTION

left

with a 38° constant temperature
and a key to stop water

right

the right handle can switch
the two levels of water outlet

Zinc alloy scald proof faucet protection, shower farewell to accidental scald. The double-layer synthetic material can enhance the heat insulation effect by passing water, and the shower is not afraid of accidental scalding.

Left side for temperature control, right side for water outlet control, the left handle can adjust the constant temperature water outlet temperature at will, the right handle can switch the two levels of water outlet (top spray water outlet, shower water outlet) freely, the zoning function design is convenient for operation, with a 38° constant temperature and a key to stop water, simple operation can be a press. The rotary handle adopts a slightly convex design, which is not easy to slide when adjusting and rotating.

**PVC MATERIAL
IS EASY
TO BEND**

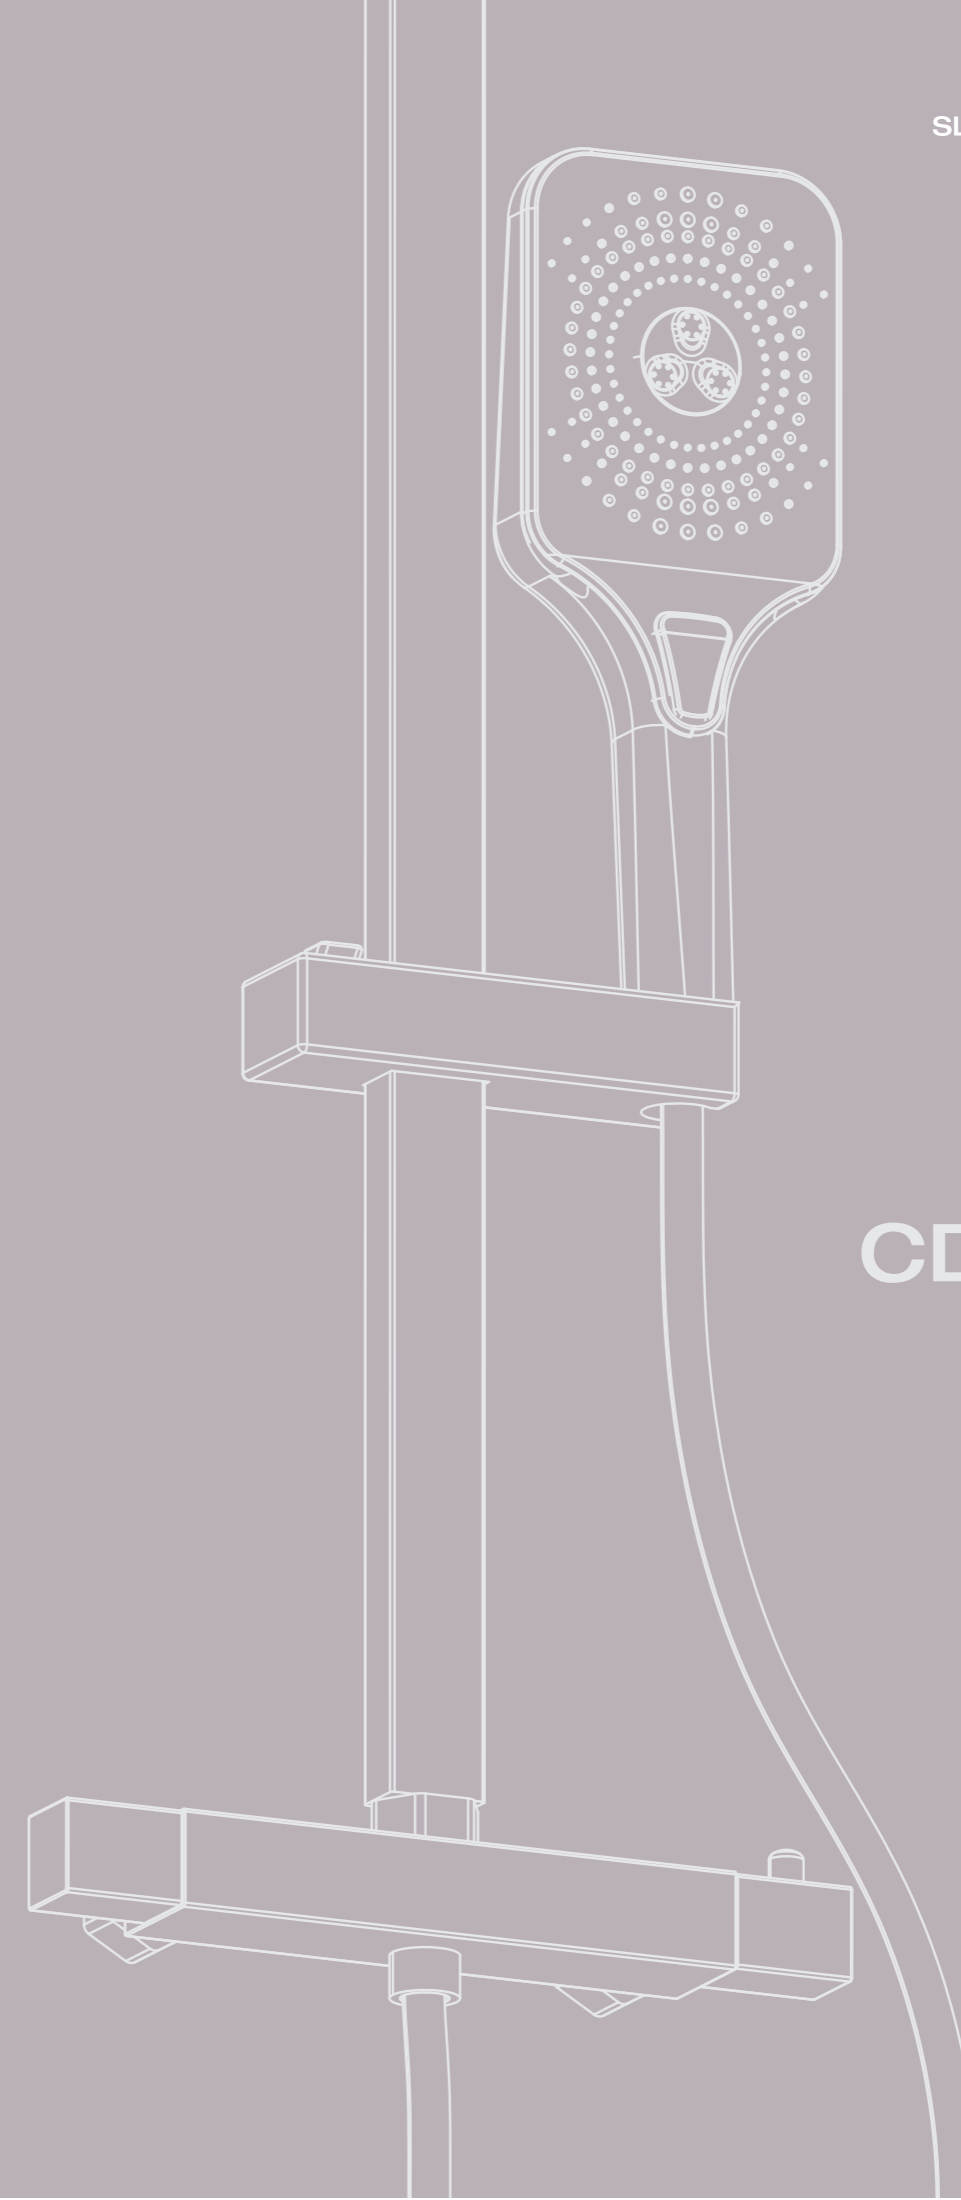

The protection is firm and hard to break when pulled, and the elasticity is not easy to deform. PVC material is easy to bend without winding and knotting, and can be stretched at any angle.

Feel the free breath of the sea breeze
for an extraordinary shower experience
